- Floor to ceiling height
- Floor to false ceiling height
- Ceiling level
- False ceiling level
- Staircase arrow point up
- Sloping ceiling arrow point up
- Roof arrow point down
- Assumed detail

The identification of service covers has been made by a surface inspection only.
Critical identifications should be verified by the lifting of covers or a full utilities survey.

Due to the inherent instability of paper materials, drawings plotted on paper may be stretched and distorted dimensions scaled from paper plots should therefore be treated with caution.

This drawing has been produced for the purpose of the original commissioning agent.
Plozman Craven Limited will accept no responsibility for details that are subsequently found to be the consequence of undisclosed facts or that were obscured from view at the time of survey or that have been altered since the survey. All data remains the property of Plozman Craven Limited until full payment has been received.

See www.plozmancraven.co.uk for full terms and conditions of contract.

ISSUES & REVISIONS

Issue No.	Description	By	Date
P01	First Issue	PCL	28.10.2022

This survey is commensurate with hand-held accuracy, as outlined in the RICS survey detail accuracy banding table.

All levels are in metres and are above Ordnance Survey Newlyn Datum derived by multiple network RTK GPS observations.
The survey grid shown on this drawing is positioned on Ordnance Survey (OS) National Grid, obtained by multiple network RTK GPS observations.
Unless otherwise stated, levels have been taken to finished floor surfaces.
All quoted dimensions are in metres.
Drawing units are millimetres.
